

European Future Skills Institute

Future Skills, Delivered Today!

www.efs.org

Our 4 Pillars and Roles

Future Skills Intelligence The Skills Detectives

We investigate the world of work, uncover hidden trends, and reveal the skills that will shape the future. By piecing together evidence from data, research, and foresight, they give us the map we need to move forward.

Future Skills Studio The Architects of Learning

With the map in hand, we design the structures of tomorrow's education. We create blueprints, craft learning experiences, and build innovative teaching approaches that bring future skills to life.

Future Skills Academy The Couriers of Knowledge

Once designed, these new opportunities must reach people. Our couriers deliver learning directly to learners—anytime, anywhere—making future skills accessible to everyone who wants to grow.

Future Skills Certification The Referees of Achievements

We ensure fairness, transparency, and trust. Like referees on the field, we watch closely, apply clear rules, and confirm when learning truly meets the standard.

Our Spectrum of Activities

EFSi Intelligence

We provide data-driven insights into market trends and emerging skill needs to guide education and training.

- Market analysis
- Skills gap reports
- Foresight studies
- Policy insights

[Learn more →](#)

EFSi Studio

A hub for educators to access resources, services, and tools that bring innovation into teaching and learning.

- Instructional design
- Teaching resources
- Educator support
- Co-creation services

[Learn more →](#)

EFSi Academy

An online platform offering flexible, high-quality courses that prepare learners for the future of work.

- Online learning
- Micro-credentials
- Flexible pathways
- Collaborative learning

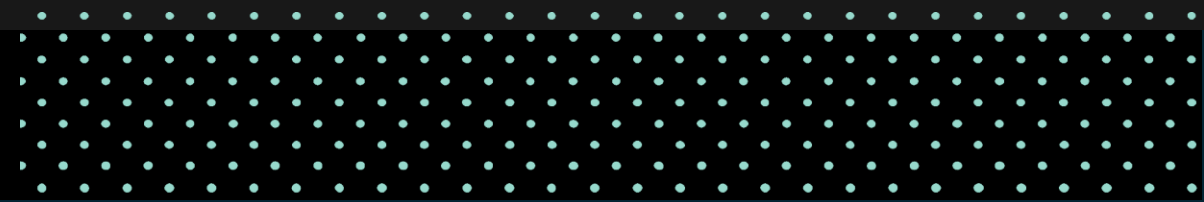

[Learn more →](#)

EFSi Certification

We validate skills and recognize quality learning with trusted certifications for individuals and institutions.

- Individual certification
- Course accreditation
- Skills validation
- Quality assurance

Are you planning a project in which you

- **map and analyse skills needs**
- **design innovative and future-oriented courses,**
- **host/offer open-access courses, or**
- **certify learners today for a changing tomorrow?**

Then involve EFSI as a specialised institute to add value to your proposal.

Partner with us to enrich your existing EU projects!

(Co-)publish your study results with us

Join EFSI Intelligence and (co-)publish with us your study results on future skills.

No matter if you are planning a future study (also open for students!) or if you have already conducted your research, simply contact us to discuss publication opportunities.

Disseminate your educational materials

Do you have materials for educators that you would like to widely disseminate?

No matter if general guidelines or materials on how to design courses, or specific educational materials for a specific course, the EFSI Studio Educators Hub is the right place to host them.

Host your course in the EFSI Academy

Interested in increasing the reach of your course?

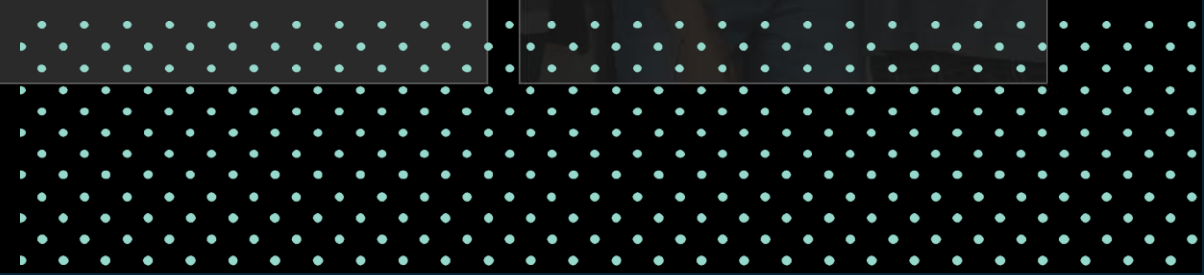

Host your course in the EFSI Academy (based on Moodle) to ensure that your courses are sustained (e.g. if EU projects end) and continue to make an impact.

Certify your course by EFSI

Would you like to get external validation on the quality of your course?

Our experts will evaluate your course materials to determine if the course can be awarded the EFSI Label.

Thank you!
And let's collaborate 😊
